

Oral Health Integration

Oral health is an essential component of whole-person care. Qualis Health helps primary care practices efficiently add preventive oral health services and reduce the impact of oral disease on their patients.

Qualis Health is a national, nonprofit healthcare consulting company dedicated to advancing healthcare for vulnerable populations, and supporting the teams to who deliver the care. With our assistance, practices throughout the United States—large and small, urban and rural—have incorporated oral healthcare.

ORAL HEALTH INTEGRATION SERVICES

Qualis Health's comprehensive oral health integration services assist practices with:

- Helping leadership understand the value proposition for oral health integration
- Identifying the first steps a care team can manage that really benefit patients
- Oral health clinical training for all front-line staff
- Creating a structure for outside dental referrals or handoffs to internal dentists
- Optimizing health IT without requiring major changes to the user interface
- Configuring population reports for oral health in order to see the impact of the effort
- Spreading and sustaining an oral health program

WHY CHOOSE QUALIS HEALTH?

Thought Leadership

Qualis Health charted the course for oral health integration in primary care when we developed the Oral Health Delivery Framework.

Endorsed by nearly two dozen national organizations, the Framework is a practical method for primary care teams to systematically incorporate preventive oral healthcare services in a way that meets their unique needs.

Real-World Experience

We've worked side by side with a wide variety of primary care delivery systems across the country, helping them use the Oral Health Delivery Framework to create, implement, spread and sustain a successful oral health program.

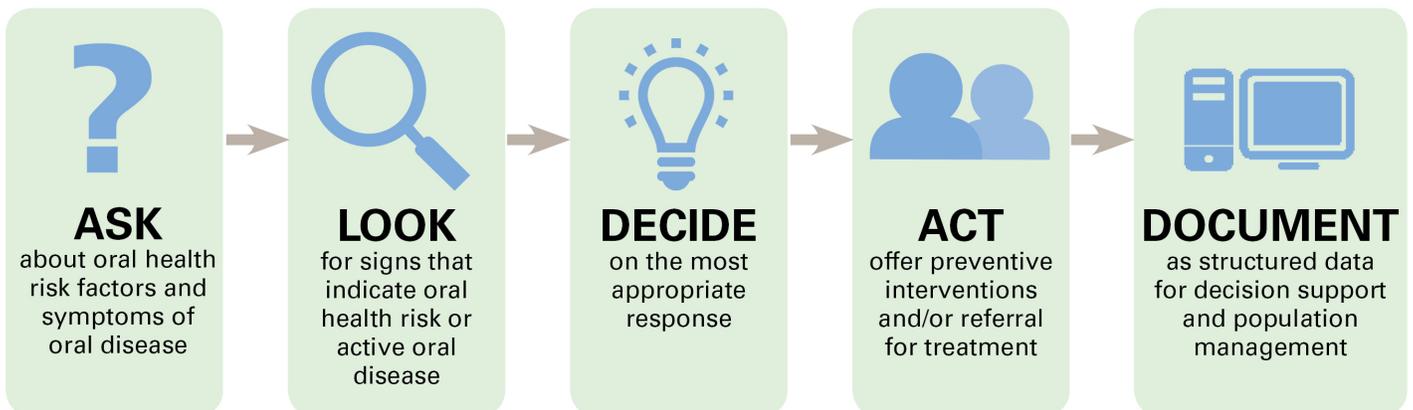

Quality Improvement Expertise

Oral health integration relies on quality improvement methodology. We've been devoted to quality improvement ever since Qualis Health was founded more than 40 years ago.

We have conducted quality improvement projects with providers across the care continuum, including thousands of primary care providers.

Evidence-Based Resources

Our Oral Health Delivery Framework is supported by templates, assessments, exercises and other resources that have been field tested by a variety of diverse primary care practices.

Qualis Health's highly skilled clinical, quality improvement and health information technology professionals help practices implement the Oral Health Delivery Framework as efficiently as possible.
